

## Project Type: Entertainment/Social

New Construction

**Project:** Portuguese National Club  
**Client:** Portuguese Club of Stoughton, MA  
**Location:** Stoughton, MA  
**Size:** 15,000 sq.ft.

### Project Description:

Our objective was to design a building, which will attract and encourage social, cultural and civic activities for the Portuguese community of Stoughton and surrounding areas. Due to site constraints, the newly designed Portuguese National Club is a two-story structure (approximately 7,350 sq. ft on each floor). The first floor consists of an activity room, bar, card room, meeting room, office, kitchen and various support areas to be used by members to socialize in a casual atmosphere. A function hall with a dance floor, service bar and support facilities are located on the second floor. There is an open stair tower feature, which enhances the interior as well as the exterior of the building. Adorning the two-story entry is the Portuguese National Club graphic. The exterior building material is concrete block veneer, including pre-cast accents around all door and window openings, and a clay-tiled mansard roof.
